THIS QUARTERS FOCUS ON COVID IMPACT

VACCINE MANDATE

FORCING THE JAB

On September 9, 2021, Joe Biden announced a multi prong plan to attack what he claims is the Delta Variant of COVID 19.

In what most are calling the largest executive power grab in known history, Biden is mandating protocols to “control” the rise in COVID 19 in 2021.

See “Joe & the Jab”

MEDICAL

WHAT IS A VACCINE?

The word vaccine is used virtually all the time in the current Pandemic of COVID 19.

What defines a vaccine? More importantly, who provides the definition in the first place?

What happens if you have sources with different definitions - which is right?

The big question is whether the CV 19 vaxx is a vaccine at all..

See “Will the real definition step forward?”

THE LAW

IS THERE LEGAL PRECEDENT TO FORCE A JAB?

The case of *Jacobson v Massachusetts*, 197 US 11 (1905) is on record for being the first case acknowledging the police power of the *State* in regard to prevention of small pox through its compulsory vaccination law.

See “Jacobson Decision”

Vaccination (pre-2015): Injection of a killed or weakened infectious organism in order to prevent the disease.

Vaccination (2015-2021): The act of introducing a vaccine into the body to produce immunity to a specific disease.

Vaccination (Sept 2021): The act of introducing a vaccine into the body to produce protection from a specific disease.

WILL THE REAL DEFINITION STEP FORWARD?

If you are considering whether or not to take the COVID 19 vaccine, it should be a reasonable request to at least understand what the medical definition of a vaccine is and what you could be injecting into your body. After all, with all the blustering and shaming for those without the vaxx, you'll like to know, right?

Well, it turns out this is not so cut and dry. To the left you'll see the CDC has revised their definition 3 times, with the most recent coming this month. Webster's has also revised its definition from "Any preparation of weakened or killed bacteria or viruses introduced into the body to prevent a disease by stimulating antibodies against it" to "A preparation that is administered (as by injection) to stimulate the body's immune response against a specific infectious disease." Webster's furthers this new definition:

- a. An antigenic preparation of a typically inactivated or attenuated pathogenic agent or one of its components;
- b. A preparation of genetic material that is used by the cells of the body to produce an antigenic substance. NOTE - referring to messenger RNA here in the actual book.

Medicine Net uses the following definition it claims the actual medical profession uses:

Injection of a killed microbe in order to stimulate the immune system against the microbe, thereby preventing disease.

So, as you can see the definitions are changing from prevent and produce immunity to produce protection. The most recent changes are to accommodate the new CV19 vaccines.

Are the new CV19 vaccines truly vaccines and the updates genuinely reflect medical process OR have the goal posts been moved to reflect political positions?

Joe and the Jab!

In rolling out his 6 prong approach to COVID 19 controls, Joe Biden made a historic power grab in his first prong by mandating vaccines for the following:

- Employers with 100 or more Employee or mandate weekly testing
- All Federal workers and Contractors that do business with the Federal Government
- Over 17 million health care workers at Medicare and Medicaid participating hospitals
- Calling on large entertainment venues to require proof of vaccine or testing for entry
- Requiring Employers to provide paid time off to allow employees to get vaccinated

So the real question is whether this President, or any President, can have this form of power via Enumerated Powers for Executive Orders. Executive Orders do carry the full power of the US government until overturned by the Supreme Court or reversed by the next President. However, there are no provisions in the Constitution for these powers in the Executive Branch. Moreover, the 14th Amendment protects against this exact form of abuse.

Joe Biden has shown no respect for the courts visa vie the proposed rent moratorium that he attempted to extend knowing full well SCOTUS had already ruled earlier, so he has zero worry of getting this reversed in court. He'll risk temporary results until this process works through the courts. As of this writing, 26 Governors have already instructed their Attorney Generals to file suit against Joe Biden.

Congress has the duty via its power of law and the tools of impeachment to reign in and remove dictator such as Joe Biden. However, the current Congress seems to have lost its spine.

For more on Biden's plan, see - <https://www.whitehouse.gov/covidplan/>

JACOBSON DECISION

Going into the 1900's there were a series of diseases the United States were dealing with. Medicine was not as advanced nor were the facilities in abundance as they are today.

We were also in a time of great deference to the *states* in regard to the law.

Smallpox, among other diseases, were far more dangerous than what CV19 currently represents. States wanted to stay ahead of these diseases and passed compulsory vaccine laws.

The Jacobson challenges the State of Massachusetts in their authority. While SCOTUS sided with the State there were several key differences here as opposed to Joe Biden's Executive Order:

- It was an existing State Law, passed by the Massachusetts Legislature and signed by their Governor. As such, not an Executive Order.
- You could opt out for \$5 - expensive for the times
- Children could be exempt with Physicians certificate stating they are unfit.
- There was no force upon the business community to force employees to vaccinate.
- There was no force upon government employees to vaccinate by government entities.

Jacobson is not a solid footing for Biden to stand on for his Executive Order. Especially considering Congressional exemptions and allowing illegals to enter without having to obtain vaccines.
